Subject: ADOT MPD Report

1. FY24-28 Planning to Programming Cycle: Virtual workshops have concluded with all the engineering districts as of September 13th. The P2P list will be finalized this month with consideration of fiscal constraints and recommending projects for scoping, to drafting the five year construction program in the later part of this year into early next year.

2. The HSIP call for projects for the FY25-26 program: The final applications due to ADOT TSS were adjusted, and comments to agencies were returned at various dates from ADOT, and those agencies were given 30 days to return the final applications. LPA is still holding to the schedule to present proposed eligible applications to TSMO in late this month, and depending on approval will have a virtual meeting with the Safety Committee at the end of October or early November. Eligibility letters will potentially be sent by the end of the year and provided to MPD for the five year construction plan in January.

Status of ADOT studies:

- 1. Long Range Transportation Plan:** The consultant is currently working on deliverables, with continued internal meetings in the department regarding the plan. The public survey has gone live this month, and public participation meetings (in person and Statewide virtual) will be scheduled for early next year (February/March 2023).
- 2. Statewide Rest Area Study:** The latest deliverable of Forecasting and Identifying Deficiencies was submitted to ADOT for review. A TAC meeting was just held last week on Oct. 19th to discuss existing conditions, data collection, and the recent deliverable to raise any questions. The SRA team is also coordinating efforts and priorities with the freight program.
- 3. Electric Vehicle Infrastructure Plan:** The EV plan has recently been approved by the Joint office. We will be moving forward with performing updates to the plan to be finalized in November, and will continue to meet with stakeholders, vendors, and have further public involvement meetings. For more information visit our EV plan website, and feel free to sign up to the mailing list to receive study updates by email and opportunities to provide input on the plan. <https://azdot.gov/planning/transportation-studies/arizona-electric-vehicle-program>
